Aspect	Think about	Yes, very good	Yes, adequate	No, not sufficient
EF Core functionality	Does the functionality match the criteria in the assignment. Can you browse and create the needed entities/views? Are the presentation clear? Are there enough sample data, so you can browse and understand the project? Is the sample data clear?			
EF Core architecture	Is there a clear architecture? Are there used abstractions and does they make sense?			
Video	Do the group present the solution clearly? Do they present an overview of the architecture of both code and project/solution			
Overall solution	How is the overall feeling of the solution? Anything missed in the above/previous categories?			
Other feedback	General feedback for the assignment
